Press Release – Successful IPv6 Workshop in the French Caribbean

IPv6 Martinique brings together French Caribbean telecom operators to accelerate IPv6 deployment

In a joint effort to modernize network infrastructures across the French Caribbean, the four major telecom operators — SFR, Canal+, ORANGE CARAIBES, and Digicel — gathered in Guadeloupe for a high-level IPv6 workshop. The event was held in the presence of a representative from ARCEP, the French telecommunications regulatory authority, and led by Faycal HADJ, the world's longest-certified Cisco CCIE and a recognized expert in IP network architecture.

This strategic workshop aimed to support the transition from IPv4 to IPv6 across the operators' core networks, ensuring improved network scalability, routing efficiency, and long-term connectivity for the region.

Thanks to the technical leadership and collaborative spirit fostered by Faycal HADJ, IPv6 was successfully deployed across all core networks of the participating operators by the end of the workshop. His professionalism and engaging approach were key to the success of this initiative.

In the wake of this regional achievement, ARCEP has announced the creation of a dedicated IPv6 working group in mainland France, confirming the importance of IPv6 adoption as a national priority.

This workshop marks a significant milestone for digital development in the French Caribbean, demonstrating the region's commitment to future-proofing its telecommunications infrastructure.

and the Telecom Ecosystem of the French Caribbean**

A representative from ARCEP alongside all telecom stakeholders of the French Caribbean

Workshop place in GUADELOUPE (French Indies)

About Martinique IPv6 Council

The **Martinique IPv6 Council** is a chapter of the IPv6 Forum dedicated to the advancement and dissemination of IPv6. Comprised of individual members, as opposed to corporate sponsors, its mission is to provide technical leadership and innovative thought for the successful integration of IPv6 into all facets of networking and telecommunications infrastructure, present and future. About IPv6 Forum

The IPv6 Forum is a world-wide consortium of international Internet service providers (ISPs) and National Research & Education Networks (NRENs), with a mission to promote IPv6 by improving market and user awareness, creating a quality and secure New Generation Internet and allowing world-wide equitable access to knowledge and technology. The key focus of the IPv6 Forum today is to provide technical guidance for the deployment of IPv6. IPv6 Summits are organized by the IPv6 Forum and staged in various locations around the world to provide industry and market with the best available information on this rapidly advancing technology.
